Earthborn - functional art-ware

Every spectrum of life, whether in a very private setting at home or in the energetic atmosphere of an urban restaurant, is enriched by the imagination and touch of the artist's hand. Hospitality occurs in many layers of life, and Earthborn pottery as art is a natural accessory to the care and attention to detail required to warmly serve each guest. Art is equivalent to never-ending possibilities, and Earthborn enjoys the challenge of blending art with the required function of each piece they produce. They are applying an art-form to the functions required by each piece. The clay body of the pieces is vitrified and the glazes do not

leach any toxins. There is not lead or cadmium added to any glazes. The products are crafted to be very durable and safe according to Health Department standards. The products are specifically designed to withstand industrial dishwashers, microwaves and ovens (if placed in cool oven and brought to temperature).

Earthborn Artisan Dinnerware is featured in 5-star restaurants, resorts, lodges, and country clubs across the United States, including MGM's famed Bellagio Resort & Casino and Treasure Island Resort & Casino in Las Vegas. Earthborn is an artist's imagination and a potter's hand dedicated to the creation of functional art-ware for the discriminating kitchen and home décor. Being able to custom design new products in a timely manner has made Earthborn pottery a favorite with chefs and cooks alike.

Earthborn pottery comes in a large variety of colors, shapes and sizes. Kitchen & Spice has a nice selection of Earthborn pottery for you to see and can special order any available pieces you might desire. Come by and see these unique works of art for entertaining. ■

Built NY babyline accessories

When Built NY designers Aaron Lown and John Swartz both became fathers they set to work to design the things they needed but couldn't find for their babies. The result is the Built NY Baby line. The first idea was an insulated baby bottle tote made of machine-washable material that soaks up spills, Built NY Thirsty Tote and Double Thirsty Tote. These totes have a convenient carrying handle that snaps to strollers, car seats, diaper bags or whatever else is handy. They stretch to fit baby bottles, juice boxes, and sippy cups.

The designers found that the Neoprene they have been using on their other

products is perfect for waterproof baby bibs. The Built NY Comfy Bibs (0-1 year) and Built NY Tidy Bibs (1-2 years) have an absorbent, soft and machine washable surface and a waterproof layer that keeps the moisture from seeping through. The Built NY Tidy Bib also has a crumb catcher that is held in place by Velcro tabs which can be undone for easy cleaning.

A stroll to the park or the grocery store is no reason to carry all the baby gear in a giant baby bag. Toss a couple of diapers, travel wipes, and your cell phone into the Built NY Strolling Tote and you are ready to go. Like all Built NY products, it is the essence of function and simplicity. The handle unsnaps to conveniently attach to the stroller or run the handle through an extra pacifier to keep close at hand. The strolling tote is machine washable and protects its contents from falls. The Built NY Baby items are available in blue with green interior or pink with orange interior. Easy to find colors! ■

Olivado Oil - gourmet oils

Olivado is a New Zealand producer of gourmet oils and has been named one of the top food innovators in New Zealand. The main business of Olivado involves olives and avocados, two very healthy, wonderful fruit. Their oils include avocado oils, macadamia oil and a new omega plus oil. As soon as their olive grove begins producing, they will be making extra virgin olive oil.

Research has shown that avocado fruit is full of monounsaturated fats, which are the 'good' fats that help reduce the 'bad' LDL cholesterol in the bloodstream. The avocado also has a very high content of a natural plant compound called beta-sitosterol that not only helps prevent absorption of 'bad' LDL cholesterol but assists in promoting 'good' HDL cholesterol. The avocado is

also rich in vitamin E.

Avocado oil is smooth and rich but does not disguise the flavor of food. Instead, it brings out the natural flavors of the dish you are preparing. That's especially important for foods like fish and chicken, which have delicate flavors. For French and Asian-style cooking, the avocado oil is a must-have in the kitchen. Avocado oil has a very high smoke point by comparison

to other oils, even olive oil. It will not burn or smoke until it reaches 550°F which is ideal for searing meats and frying vegetables and meat in a wok.

Olivado macadamia nut oil contains higher levels of heart-healthy monounsaturated fat than olive oil, contributing to a nutritious and balanced diet. Olivado macadamia oil is made from quality nuts from Queensland, Australia. This golden colored oil is ideal as a salad dressing, drizzled over vegetables or dipped with bread. Its 450°F smoke point makes it excellent for high heat cooking such as frying or roasting. It can be used in baking and is especially good in pastries,

The Hampton diet touts macadamia oil as a metabolism booster, thus contributing to weight loss.

The latest addition to Olivado's oil selection is omega plus oil. Two teaspoons daily of this exquisite cooking, dipping and salad oil is specially formulated to give you the proper balance of omega 3, 6 & 9 fatty acids. It is a delicious blend of cold pressed olive, avocado and flaxseed oils. It is all-natural and contains no trans-fats. It is exclusively available from Olivado! ■

— Le Creuset cook & bake pans —

Le Creuset cook N bake pans are made of 100% silicone. They are lightweight and totally flexible, giving them many advantages over classic baking tins. They are made from FDA approved silicone and are completely safe for food use. They are heat resistant to 536°F, making them ideal for baking and roasting in the oven or in the microwave. They are cold resistant to -104°F, making them especially suited to molding, chilling and freezing. The pans will not absorb odors or flavors. They are non-stick so minimal greasing is required. Recipes can be easily and perfectly released from the bakeware without sticking.

Silicone bakeware can be stored rolled up or folded, requiring minimal storage space, but will return to its original shape when needed. The bakeware can be put in the oven straight from the freezer. Extreme temperature changes will not harm the silicone bakeware. It is easy to clean and dishwasher safe. There is a 10 year warranty on the bakeware (with normal use). There are square pans, loaf pans as well as different shapes and sizes of muffin pans. Free recipe cards are included with the pans for customer convenience. If you haven't tried out one of these new pans, come in and see them. They really make baking easier. ■

We're going electronic!

We're going electronic!!! Our newsletter will soon be available by e-mail.

If you are interested in receiving the newsletter electronically, please notify us of your desire. We will also be sending out periodic e-mails about specials on cookware, knives, etc including information about new products coming into our store.

Preferred customers can also receive their checks via e-mail. Let us know if you would like to receive your checks this way.

We hope our e-mail service will be helpful to those individuals who like to use their computers. We are hoping to soon be able to offer our specials on line. We will keep you informed. ■

— Gadgets 20% off a featured gadget everyday! —

Every day during April, a different gadget will be offered at **20% off** for one day only. All of the items on the gadget page will be offered on a day plus many others. For a complete list of gadgets being offered in April, visit our store or our website. ■

Silicone Measuring Cups & Spoon Sets

Chef'n has just introduced a new collapsible silicone measuring cup set and a measuring spoon set. They expand for use and contract for storage, a fun space-saving design. They are stain-resistant, hi-temp 650°F silicone cups and spoons which are dishwasher safe in the top rack. They are available in bright, fun colors. ■

Palm Peeler™

The power of peeling is right in the palm of your hand. The PalmPeeler™ easily slides on the finger, tucks in your palm and peels anything you can throw at it. This neat little package is dishwasher safe on the top rack with a stainless steel blade and convenient eye at the tip. It is contoured of soft rubber to fit the hand. It comes in variety of bright colors to add pizzazz to any kitchen. ■

Mango Splitter™

Mango Splitter™ from OXO is a gadget for removing the mango seed and slicing the fruit in half with one simple press. The splitter has soft, comfortable handles and sharp, sturdy stainless steel blades. It is dishwasher safe. Once the mango is halved, the fruit can be removed by cutting in the skin horizontally and vertically, taking care not to cut through the skin. By pushing the skin inside out, the cubes of mango can be cut off ready for use. ■

Flexicado™

Avocado lovers will love the Flexicado™, an avocado peeler and slicer. Simply squeeze or relax the soft flexible grip. One swoop gets it all-top to bottom. Seven fins segment the ripe avocado for salads, sandwiches, guacamole and more. It can be used with either hand and is dishwasher safe. ■

Fruit Scoops™

Fruit Scoops™ are nylon tools which scoop fruit from the skin and slice, core or create shapes for a more appetizing appearance. The set of three has a large size for scooping cantaloupe, honeydew or watermelon, a medium for seeding bell peppers, tomatoes or potatoes and a small for scooping kiwi, making stuffed zucchini or working with any other small fruit. ■

Soft Skin Peeler

Peeling tomatoes and other soft skinned produce just got easier. Zyliss offers a soft skin peeler which has multi-purpose serrated edges which quickly peel fruits and vegetables, even difficult soft-skinned ones. It is great for peeling ginger. The two edges on the blade permit back and forth peeling and right or left-handed use. The serrated blades follow the contours of food, efficiently removing the skin, not flesh. An extra sharp steel tip easily removes blemishes on the produce. ■

Herb Snips™

These Herb Snips™ is a versatile kitchen tool for fine cutting jobs. These herb snips are especially designed for snipping and mincing herbs, scallions and other delicate foods. The handles are ergonomically designed for comfort and better control. Small grooves between the blade and handle make stripping herbs like thyme fast and easy. ■

FoodLoops™

The FoodLoop™ replaces kitchen string and toothpicks in the preparation and cooking process. It is the first silicone trussing tool and is quick, easy and fun to use even for cooks with arthritis. The foodloop can be used to secure stuffed, rolled, bunched and wrapped meats, fish and veggies. It can be used on the stove top, in the oven, microwave or freezer. It is re-useable and dishwasher safe. ■

Tomato Corer

Tomatoes contain lots of healthful vitamins and minerals and should be eaten as often as possible. Yet unripe tomatoes and the plants, stem and core contain small amounts of the toxin solanine. Thanks to Silit's tomato corer, cores are easy to remove. All you do is press down on the tomato with the corer, turning as you push it into the tomato until the flesh gives way. Then you turn the corer again and pull out the undesirable core. ■

20% off a different gadget everyday during April! ■

Tasteful Times Spring 2006
